Four Twitter Strategies That Makes Tweeting Easy and Productive

Many business professionals and entrepreneurs use Twitter and other social media to stay connected, develop business, and read up on the latest news. It isn't always easy to stay up-to-date and "tweet" information that others find interesting or useful, so we thought we'd share a few tips we use that make the process easier to manage.

- 1. Sign Up for Daily Online News Emails:** Magazines, such as the Wall Street Journal, offer daily emails with up-to-date article and facts.
- 2. Download Free Organizing System:** There are several social media organizing software programs on the market. We recommend TweekDeck, which you can use to manage Twitter, Facebook, & LinkedIn to organize and track people you follow.
- 3. Follow Great People:** People use social network sites for different reasons. Some use Twitter for social updates and others use it for business. We recommend following a few great people as this will help expand your network and learn from a wide variety of people.
- 4. Re-Tweet Interesting Posts:** If you follow great people, they tend to post great things. When they do, re-tweet some of their posts and to expand your knowledge base.

IRS on the Internet

Department of the Treasury
Internal Revenue Service

The address for the Internal Revenue's web site is www.irs.gov. It has lots of useful information. You can download forms, you can get questions answered and last,

but certainly not least, you can e-file your tax return if you qualify. Wondering if you qualify? The information on the site can help you figure that out too. It's certainly worth a few minutes of your time, especially if it can speed up that refund you're getting! To download state tax forms go to the Nebraska Department of Revenue site at: www.revenue.state.ne.us/tax/forms.htm.
