

MARCH 2008

BROADBAND INTERNET REQUIREMENTS:

We're often asked what's needed to have broadband Internet access; a new computer or some type of special software? The answer is fairly simple: if you have 1 computer, it needs a Network Interface Card (also known as a NIC adapter or ethernet card), or if you have multiple computers to be connected to broadband internet, they must be networked. These networked computers will need a hub or a switch to create a LAN (local area network).

No special software is needed for broadband Internet. Our system security is specially designed to offer unmatched secure digital connection, however you can add firewalls within your network if you want to protect yourself further.

We have installed broadband access on computers with processors as old as a Pentium with 200 MHz, but we feel you'll be more likely to realize the speed potential that broadband Internet offers if you use a newer computer.

ATC COMMUNICATIONS WISHES YOU A HAPPY ST. PATRICK'S DAY!

INFORMATION ABOUT ATCJET.NET

SUPPORT SERVICE

If you've ever needed assistance with your Internet connection or had questions about computer malfunctions you've probably talked to ATCJET.NET's friendly and knowledgeable support staff consisting of Lori, Myron, Steve, Jodi, James, Corey and Dennis.

Occasionally, you may have had to leave messages when a representative wasn't available to take your call. It is our goal to offer timely replies to your requests for help, but we would also like to make you aware of the hours that the support center is open. If you happen to call when the center is closed, be assured, we will answer your message promptly as soon as we re-open. The times quoted are for the Central Time Zone.
