Access Codes/Directions

Call Forwarding –

To activate dial *72, listen for tone, dial the number you wish calls to be forwarded to, after receiving the confirmation tone, wait 4 seconds for call to complete.

To restore normal service, dial *73, 2 bursts of dial tone indicates that the condition has been removed.

When call forwarding is in effect, your telephone will ring once each time your number is dialed, but you can not answer it.

Call Waiting

You are notified by a burst of tone, tap your hookswitch or flash key to place original call on hold and answer incoming call, a second tap or flash reconnects you to original call. Subsequent taps or flashes will switch you from one call to the other.

Three-Way Calling

Tap your hookswitch, listen for 3 bursts of dial tone, dial number of third party.

If third party does not answer tap your hookswitch to return to original call.

When the third party answers, tap your hookswitch to set up a three-way conference. If either of the other two parties hangs up first, you will still be connected to the remaining party. If you hang up first all connections are released.

Telemarketer Do Not Disturb

To activate dial *78, hang up.

To cancel dial *79, hang up

To set or change pin dial #87 or *10 then enter pin
